Based on the provided information, the email thread titled "Enron's 2001 Goals" shared Enron's goals for the year 2001 with its employees. The document summary does not provide specific details about these goals, but it suggests that Enron set certain objectives for the year. If you are looking for more details about Enron's 2001 goals, it would be best to review the email threads shared with the subject "Enron's 2001 Goals" for a more detailed view of the goals set by Enron for that year.

## **Result 3**

Based on the provided documents and information, Governor Davis issued executive orders calling on the Federal Energy Regulatory Commission (FERC) to maintain price caps on wholesale electricity sales in California during the energy crisis. These executive orders were aimed at addressing the high energy prices in the state and ensuring fair pricing practices. The impact of these executive orders on Enron could be significant, as Enron was a major player in the energy market and would have been subject to the regulations and price caps implemented by FERC under Governor Davis' orders. The orders may have affected Enron's ability to manipulate energy prices for profit, as well as its overall operations and profitability in the California market. To fully understand the specific implications on Enron, further details on how the company operated in the context of energy regulations and price controls would be needed.
